Ted Hicks, AVS, Value Engineering, CECOM-LCMC

## Training Description

Instruction includes a brief overview of Value Engineering (VE) Methodology, VE Proposals, and VE Change Proposals, and their applications in government and industry. Value Engineering Change Proposals (VECPs) offer industry a unique opportunity to assist the U.S. Army with services, equipment, improved logistics, and technology, while saving money in the process. Industry uses VECP to upgrade its own products, services, processes, and substantially increase profits.

## Directions to the Best Center

- From I-95, take Route 22 West (Exit 85) towards Churchville.
- Turn Left onto Technology Drive (~1/4 mile from interstate), there will be a large gray and white sign that says "HEAT Center."
- Follow Technology Drive ~1/4 mile, the Battelle Eastern Science and Technology Center will be on the right.
- Park in the Visitor Parking lot
